Forecast for Friday 10 Nov 2023

Weather: Remaining showery overnight although tending to become less frequent and heavy. Some morning mist is likely in more sheltered areas of the Welsh mountains and some patchy fog in places. Once this has cleared a settled sunny day is expected, perhaps more cloud developing later in the afternoon and evening and a few showers developing later.

Chance of cloud-free hill tops above 600m: 60% rising to 90% during the morning, falling to 70% with afternoon showers.

Low cloud and visibility: Some early low cloud from overnight showers and also where there is fog at low level, but scattered cloud tending to lift and clear. By mid morning very little low level cloud is expected with excellent views likely. Cloud thickening and lowering in afternoon showers and visibility may become moderate at times by late afternoon. If fog forms visibility will become poor again at low level during the evening.

Meteorologist's View

Feeling chilly in fresh northerly winds especially in early mist and fog, feeling warmer in the Autumn sunshine later.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Thu 09 Nov 2023	21.8mm	34.4mm	37.6mm

Forecast for Saturday 11 Nov 2023

Weather: Mist and fog, are likely to occur on Saturday morning with frost expected in some sheltered areas. It will become mainly dry and bright but cloud thickening in the afternoon. Still feeling chilly in the northerly winds.

Maximum wind: Northerly 10-15mph, becoming easterly 5-10mph later.

Chance of cloud-free hill tops above 600m: 50% rising to 90%, early low level cloud.

Low cloud and visibility: Early inversions are possible with low level cloud and good visibility at height. Cloud will lift and clear to give excellent visibility and good clarity of air for much of the day.

Temperature: **Valleys:** Plus 1 Celsius rising to 7 Celsius.
At 600m: Zero rising to Plus 4 Celsius.
Freezing level: Above all summits
